Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users.  $\wp$ 

1 Phases  High-level steps your user needs to accomplish from start to finish	Account Creation	Outlook of Containment zone Area	Tracking User Location	Showing alert notification if any one trespass into the containment zone
2 Steps Detailed actions your user has to perform	Tracking Location	Checking whether the location is containment zone or not	Send alert message	Update the containment zone database
Feelings  What your user might be thinking and feeling at the moment	People will know the containment zone updates	People will notified when entering to containment zone	People will know the safest area	People will know about the affect of pandemic
	To track the location		Database	People don't know the
